

Building on quality

FPR Reversible Plate Compactors

Ideal and versatile for high production efficiency on sand, gravel and cohesive soils. Increased compaction force with smooth transition between forward and reverse travel.

- Heavy duty roll-cage with lifting eye.
- Hydraulic forward & reverse mechanism.
- On-the-spot compaction.
- Reverse travel safety protection ensures machine travels forward if operator releases the handle.
- Impact resistant and open, self cleaning baseplate.
- Sealed belt cover design for protection to clutch and belt.
- Handle folds to 45° and 90° for transportation and storage.
- Honda petrol and Lombardini diesel options.

Improved Wheel Kit NOW with 260mm diameter heavy duty pneumatic tyres included as standard with every reversible.
