

The professional steamer that is compact yet powerful, built for frequent stripping use.

## Introduction

The LCS Pro Steam<sup>®</sup> offers many of the performance features of the renowned LMB Steam Master<sup>®</sup> wallpaper stripper but is lighter and more portable.

The powerful 2750W element, with the large, tough, yet lightweight steam plate can penetrate through several layers of wallpaper and Artex<sup>®</sup> at a time, making it ideal for those heavy weight on site jobs.

The large 7.5 litre anodised water tank with convenient water level indicator, allows up to 90 minutes of steam time between refills giving longer continuous stripping. The tank comes with a 3 year tank corrosion guarantee. Only clean water is used so it is also cost efficient.

The steam plate, cable and hose are designed to pack away neatly making it compact and easy to move from job to job.

This professionally rated wallpaper stripper is a reliable solution for frequent use. It comes with many safety features not found on other steamer strippers including an anti-kink 5 metre cool run hose.

It is the perfect choice for painters or decorators and is also ideal for the tool hire or rental market.
