

AX-2S—An economically and surprisingly compact, light design

The AX-2S features a built-in magnetically dampened compensator that automatically levels the line of sight. Its airtight design enables you to use even in dusty conditions or light rain. In addition, a baseplate design offers a choice of flat- or spherical-head tripod instrument mount.

Other features

- High accuracy of $\pm 2.5\text{mm}$ in 1km double-run leveling
- Bright, sharp, clear 20x image complemented by 0.75m/2.5ft. minimum focusing distance for ease of use even in tight spaces
